

## PA-300 CLEAR DUCT INSULATION ADHESIVE

The PA-300 is a quick tack, quick dry duct liner adhesive. Amber color, brush or roller application makes this an excellent product at an economical price. The PA-300 is a flammable solvent based product

### APPLICATIONS

- Bonding fiberglass insulation to sheet metal ducts.
- Bonds well to aluminum, galvanized or stainless.
- Bonding aluminum foils, paper, or vinyl films to fiberglass insulation.
- Bonds to a wide variety of surfaces
- Bonding Fiberglass insulation to other rigid materials such as the interior of trucks, railroad cars and airplanes.

### ADVANTAGES

- Fast and permanent bonding of insulation to ducts achieving a positive vapor barrier.
- Can be roller coated smoothly for easy and fast application resulting in labor savings
- Quick tacking with a long open time allowing a wide range of application time.
- Excellent coverage
- Great heat resistance over many years of exposure.

### PROPERTIES

Composition:	Bonds well to galvanized or aluminum sheet metal and will maintain high flexible strength throughout its life.
Color:	Light amber
Viscosity:	Light brush-on, 500 to 600 cps
Solids:	~25%
Solvents:	Cleanup – mineral spirits, turpentine, or aromatic solvents
Storability:	6 months in tightly closed containers.
Service Temperature:	0°F to 180°F
Application and Storage:	40°F to 100°F
Weight per Gallon:	**
Application Techniques:	Spray
Tack Time	1 minute
Open time	30 minutes
Flammability	Flammable when wet

Not recommended for exposed outdoor use
